## PREFACE

Les statistiques scolaires constituent de nos jours un outil indispensable pour la gestion du système éducatif. A cet effet, elles méritent une attention toute particulière aussi bien au niveau de la collecte qu'au niveau du traitement, de la diffusion et de l'utilisation à des fins d'évaluation des plans et programmes du Secteur.

Le Service Statistiques et Planification (SSP) a pour mission entre autres :

- d'organiser la collecte des données statistiques ;
- de centraliser, traiter, analyser et conserver ces données ;
- de confectionner et de publier les annuaires statistiques,

Le souci du SSP est d'améliorer d'année en année la collecte des données statistiques à partir de la fiche d'enquête. C'est ainsi qu'au cours de l'année scolaire 2003 - 2004, la fiche d'enquête statistique du Secondaire Général fut révisée pour mieux l'adapter à la sous région et aux besoins des utilisateurs sans pour autant perdre sa normalité internationale.

L'objectif recherché est de répondre autant que possible aux préoccupations des différents partenaires.

La fiche d'enquête statistique de l'enseignement secondaire général fait une description détaillée de la situation de chaque établissement du pays (public, privé). Elle permet :

- d'avoir une situation complète de l'établissement et de faire son diagnostic ;
- de faire son bilan, en vue de savoir si elle progresse ou si elle régresse ;
- de comparer les écoles de la sous-préfecture, de la préfecture, de la région et du pays ;
- d'orienter le collectif des enseignants, les chefs hiérarchiques et les parents d'élèves dans la gestion de l'établissement et dans la prise de décisions plus réalistes en fonction des ressources disponibles.

Les résultats des enquêtes permettent :

- de rendre compte à la société de l'état de son école ;
- de comparer la situation et le fonctionnement du système éducatif national dans le temps (passé, présent et futur), dans l'espace (entre les écoles, les sous-préfectures, les communes, les préfectures et les régions) et par rapport aux systèmes éducatifs étrangers ;
- de chercher des solutions aux problèmes constatés, de corriger les méthodes jugées peu efficaces ou mauvaises ;
- de prévoir l'avenir et de planifier les efforts.

La collecte des statistiques scolaires permet de voir le système éducatif sous trois (3) angles différents : l'accès, la qualité et la gestion. Pour ce faire, les statistiques recueillies doivent être fiables, disponibles à temps opportun et suffisamment diffusées.

Cette année, les principales innovations portent sur :

- Localisation et identification de l'établissement,
- Informations générales sur l'établissement ;
- Elèves et caractéristiques ;
- Personnel et caractéristiques;
- Données financières ;
- Manuels scolaires
- Caractéristiques du mobilier et des équipements ;
- Locaux ;
- Observations diverses ;

Le SSP profite de cette occasion pour exprimer toute sa gratitude aux partenaires techniques et financiers que sont la Banque Mondiale, l'US-AID et l'ISU pour l'appui inestimable qu'ils ne cessent de lui apporter dans la réalisation de ses multiples activités en général (Etudes spécifiques, équipements techniques, formation de cadres, enquêtes sur le terrain, etc.) et la préparation des annuaires et dépliants statistiques en particulier.

Avec l'espoir que ces informations pourront contribuer à améliorer l'annuaire statistique de l'enseignement secondaire et à satisfaire les besoins des utilisateurs, le SSP sait compter sur la bonne compréhension de chacun et de tous. Les remarques et suggestions pour la qualification du document seront toujours les bienvenues.

Bakary DIAWARA

Directeur du Service Statistiques et Planification - SSP

## Résumé

L'ENSEIGNEMENT SECONDAIRE GENERAL comporte deux cycles: le premier d'une durée de quatre ans (7<sup>ème</sup>, 8<sup>ème</sup>, 9<sup>ème</sup> et 10<sup>ème</sup> année) est sanctionné par le Brevet d'Etudes du Premier Cycle - BEPC et le second cycle, d'une durée de trois ans (11<sup>ème</sup>, 12<sup>ème</sup> et Terminale) est sanctionné par le baccalauréat (1<sup>ère</sup> partie en 12<sup>ème</sup> année et 2<sup>ème</sup> partie en Terminale) dans trois profils: Sciences sociales, Sciences expérimentales et Sciences mathématiques:

Pour l'année scolaire 2005-2006, il a enregistré une population scolarisable de 1.364.513 enfants (835.938 pour le premier cycle et 528.575 pour le second cycle), l'enseignement secondaire général compte un effectif de 478.364 élèves dont 163.468 filles. D'où un taux brut de scolarisation (T.B.S;) pour le collège de 42,6% et de 23,1% pour le lycée. Les filles représentent 34,2% de l'effectif total des élèves et ont un taux brut de scolarisation qui s'élève respectivement à 29% au collège et à 13% au lycée.

Le taux d'admission pour le premier cycle (collège) est de 50% pour l'ensemble, (36% pour les filles) ; au deuxième cycle du secondaire (lycée), il est de 23% (garçons et filles) et 14% chez les filles.

Du point de vue infrastructures, 793 établissements (558 collèges, 44 lycées et 191 lycées-collèges) avec 5 751 salles de classes toutes catégories confondues. En effet, sur ce nombre total nous avons 57% d'établissements publics alors que les établissements privés représentent 43%.

Le corps enseignant est composé de 12.175 Professeurs chargés de cours dont 7.343 pour le secteur public. Soit 4832 du privé (39,7%). Les femmes enseignantes sont au nombre de 586, soit 463 femmes pour le public contre 123 au privé et représentent 4,8% du total des enseignants.

Les données agrégées dans cet annuaire portent sur les variables suivantes :

- I. Les caractéristiques générales
- II. Les infrastructures scolaires
- III. Les matériels et mobiliers
- IV. Les manuels scolaires
- V. Les élèves et groupes pédagogiques
- VI. Les enseignants et personnels administratifs
